

## Product Highlights

### Advantages:

- Improves the overall efficiency
- Reduces the migration time as historical data is moved to the GoSaaS Archiver while the required data is moved to the cloud

**GoSaaS Archiver** allows you to store your historical product data in a secure and searchable portal. The portal enables navigation of the historical data in a context-aware fashion that maintains references to all related data entities like BOMs, documents, change records, and CAD drawings.

### How can the GoSaaS Archiver help?

When the customer migrates from Agile PLM or another on-premise PLM solution to Oracle PLM Cloud, moving historical data to the Cloud presents a unique challenge. Customers may want to convert this into an opportunity to simplify and improve their product data configuration.

- They can do so by keeping their historical data in GoSaaS Archiver, where it stays available for future reference in meeting reference and compliance needs
- Links to archived data from their Oracle PLM Cloud are also created
- This approach can significantly reduce Oracle PLM Cloud implementation time and complexity by only moving the most current version of the product data to the Cloud.
- GoSaaS Archiver comes with pre-built data migration tools for Oracle Agile PLM. It can also support Items, BOM, Documents, Drawings, and other common product data entities provided in CSV format or as a database

### Features

- Cloud-hosted
- Highly available and scalable solution
- Secure
- Multiple search option
- User-Friendly search options
- Basic keyword search options
- Extensive viewing ability
- Highly responsive and intuitive interface

**APPROVAL FOR CHANGE**

APPROVAL FOR CHANGE (AFC) IS USED FOR REQUESTING AND MANAGING REVISIONS FOR PARTS AND DRAWINGS. AFC IS REQUIRED FOR ALL PART AND DRAWING CHANGES. NON-ENGINEERING OR ENGINEERING CAN INITIATE AN AFC. USER MUST BE IN THE DOC CREATE PERMISSION GROUP TO INITIATE AN AFC.

## Product Highlights

### Features

- Cloud-hosted
- Highly available and scalable solution
- Secure
- Multiple search options
- User-Friendly search options
- Basic keyword search options
- Advanced search options to build complex search criteria
- Allows users to export search results in MS Excel format
- Saves frequently searched queries
- Extensive viewing ability
- Allows a user-friendly view of Bill of Materials
- Allows users to view related documents
- Allows users to view related items
- Users can view the version history of objects
- Highly responsive and intuitive interface
- Admin Panel for the desired user access

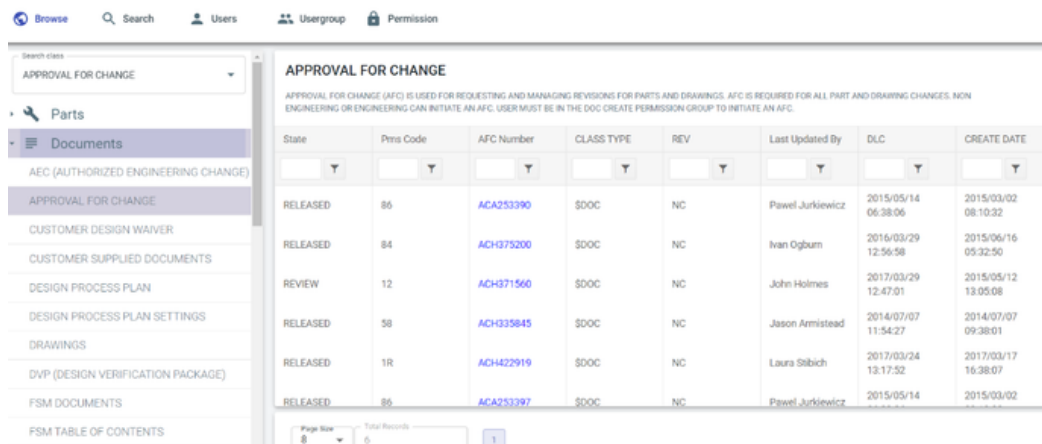

**GoSaaS Read-only Portal** enables your company's allied group and key internal users to view current product data in a secure and searchable portal. The portal allows for referencing to real-time data entities like BOMs, documents, change records, and CAD drawings to ensure fruitful collaboration and top-notch product quality at minimal cost and time.

### How can the GoSaaS Read-only Portal help?

- GoSaaS Read-only Portal comes with pre-built data migration tools for Oracle Agile PLM. It can also support Items, BOM, Documents, Drawings, and other common product data entities provided in CSV format or as a database
- Suppliers can view updated information to ensure accurate material deliveries
- Single streamed collaboration regarding product data such as Design, Documents, Compliance, and Quality Issues with internal teams and external groups such as suppliers or clients
- Providing complete access to all information may pose a security risk and is too costly. Therefore, the GoSaaS Read-only Portal allows different groups of people limited and restricted access to the company's information present in the database

### Advantages:

- Offers customized reconfigurability & limited access of the GoSaaS Read-only Portal
- Offers secure, user-friendly, and designated view
- Improves the overall efficiency as there is one stream where all users collaborate
- Organized the data and makes it easily available whenever required
- Improves your system's performance while meeting relevant data retention requirements
- Customizations including save searches & links

The screenshot shows a web application interface with a navigation menu on the left and a main content area. The main content area displays a table titled "APPROVAL FOR CHANGE" with columns for State, Pms Code, AFC Number, CLASS TYPE, REV, Last Updated By, DLC, and CREATE DATE. The table contains several rows of data, including records for "RELEASED" and "REVIEW" states.
